Theme · System
Appearance
Requirement → runnable reference
The same deterministic sequence is readable by a person and discoverable by an agent.
1 · REQUIREMENT
Investigate chamber drift and compare affected/control distributions
2 · RECOMMENDATION
Pattern: analysis_workspace · Recipe: excursion-defense-line
3 · AUTHORITIES
analytics:fdc_multi_sensor · analytics:rca_affected_control · component:data_table
4 · SCAFFOLD
nicegui-base create-recipe ./chamber-drift --name "Chamber Drift Review" --recipe excursion-defense-line
5 · BUSINESS/DOMAIN LOGIC
app/services and app/repositories; keep provider queries and domain calculations out of page callbacks
6 · EXTENSION RULE
Prefer registered pattern/component/visualization and token APIs; isolate a documented escape hatch only when no authority fits
7 · EXPECTED RESULT
A separately runnable app with governed filters, linked chart/table state, accessible empty/error states, and domain logic isolated in app-owned services
nicegui-base agent-context "Investigate chamber drift and compare affected/control distributions"
nicegui-base recommend-pattern "investigate chamber drift"
nicegui-base recommend-visualization "compare affected control distributions"
